

HDMI2.1 switcher 6x1 with Scaler and de-embedded audio

DESCRIPTION

The ALF-WU6-8K is an HDMI2.1 switcher and scaler , with 4 HDMI & 2 USB-C inputs and one HDMI output. It is Full HDMI 2.1, FRL 48Gbps, and HDR support ensure stable signalling even at the highest bandwidths, HDCP 2.3 compliant. This switcher includes de-embedded audio, scaling, EDID management, and front panel LED indicators for power and signal status.

FEATURES

- HDMI2.1, HDCP2.3 compliant
- 48Gbps Bandwidth (FRL 5)
- Up to 8K 60Hz 4:2:0/8K 30Hz 4:4:4/4k 120Hz
- Switching time: within 3 seconds
- EDID management via 5 pin DIP switcher, with the source through a display's EDID or internally stored EDID
- De-embedded audio: 1 x balanced, 1 x Optical
- Downscaling from 8k to 4K, 4K to 1080p to the legacy displayer
- Backlit LED to show the working status
- RS232, IR and GUI control
- Alfatron or Josawa unique RS232 codes and GUI design
- TCP/IP is to allow the FW upgrade to be done over the network & to be discoverable via third part management system
- CEC Display ON/OFF control with backlit button
- HDMI2.1, HDCP2.3 compliant
- 48Gbps Bandwidth (FRL 5)
- Up to 8K 60Hz 4:2:0/8K 30Hz 4:4:4/4k 120Hz
- Switching time: within 3 seconds
- EDID management via 5 pin DIP switcher, with the source through a display's EDID or internally stored EDID
- De-embedded audio: 1 x balanced, 1 x Optical
- Downscaling from 8k to 4K, 4K to 1080p to the legacy displayer
