

2x50-watt active speaker set

DESCRIPTION

The ALFW-550P is a 2x50-watt active speaker set featuring balanced audio inputs and a powerful stereo speaker system, making it ideal for meeting rooms, conference rooms, classrooms and similar environments. Despite its compact design, the ALFW-550P delivers excellent sound performance through integrated 2-way speakers units. The system combines a dedicated bass woofer with a midrange and tweeter driver, providing clear vocal, detailed highs and strong low-frequency response. Included speaker mounts allow for flexible installation, enabling placement on a desktop or secure wall mounting.

FEATURES
